Top Sessions:

놓칠 수 없는 행사 하이라이트:

Takeda, Novartis, J&J and **Eli Lilly** representatives will share what they are seeking when evaluating the Korean landscape of novel CNS targets and modalities.

ABL Bio will present on IGF1R-mediated transcytosis across the BBB and **AriBio** will share lessons from out-licensing ARI1001 to Fosun Pharma at Phase III.

Sovargen, Rznomics and **Angelini Pharma** will discuss emerging RNA editing, RNAi and ASO technologies to access undruggable CNS targets.

Attendees Include:
